

CABINET

THE STYLISH WAY TO PROTECT YOUR SPA. EVERY TIME.

1 BASE STRUCTURE

STRONGEST BASE IN THE INDUSTRY

- We start with Pressure Treated Wood to resist rot, corrosion and insects
- Rails and cross-bracings are secured with 1" galvanized fasteners
- Vertical supports are reinforced with corner gussets & vertical angle bracings

SPA CABINET FRAME

BOTTOM ARMOR™ TRAY

- Locks in heat and seals out moisture while protecting the spa's underside

Insulation

BOTTOM ARMOR™ TRAY

2 MAIN FRAME

DURABLE INTEGRATED FRAMEWORK

- The cabinet is actually an integral part of the construction of the spa
- Coleman® Spas cabinet frames are strong enough to support even the largest spa designs

INTEGRATED FRAMEWORK

- Reinforced wall made of treated lumber is bracketed and reinforced at the corners
- Treated lumber struts unitize and square the entire cabinet
- Wood support beams are attached directly to support the seating area
- Decorative panels are added for beauty and elegance

3 SMART DESIGNS

EQUIPMENT ACCESS DOOR

- Easy access to the most efficient motors and pumps in the industry

EASY ACCESS EQUIPMENT DOOR

EQUIPMENT ENCLOSURE

- Isolates the equipment area from the remainder of the spa to ensure easy access to the most critical components

EQUIPMENT ENCLOSURE

FRESH AIR VENTS

- Provides the motors with cool, fresh air

ENTERTAINMENT OPTIONS

- Enjoy your soaks with the soundtrack of your choice with the available iSound™ iPod Dock & FM receiver with Two Speakers

4 COLORS & COVERS

CABINET CHOICES

Coleman® Spas Choice Panels

- Insulating fiberglass panels with wood-like detailing are virtually maintenance-free

Coleman® Spas Preferred Panels

- High-grade synthetic material that mimics the look of wood

Mahogany

Mist

Insulation

HYDRO-ARMOR™ TAPERED SPA COVER

- Designed with a tapered height, angling downward from the center to the sides to drive off rain and prevent precipitation from pooling
- Interior lining is crafted of polyester-reinforced PVC with Mylar coating
- Provides enhanced heat retention and superior thermal insulation
- A snug, zippered fit with padded flaps all around the cover's edges prevents heat seepage
- Rated to withstand 1,500 UV-hours of protection to prevent cracking, splitting or fading
- Safety straps employ a lock-and-key
